

MYSORE SRIDHAR

Full Stack Web Developer

+91-7396947527 @ mysoreidhar72@gmail.com sridhar-mysore.vercel.app linkedin.com/in/mysoreidhar Hyderabad

EDUCATION

BTech Computer Science in Artificial Intelligence and Data Science Sri Indu College Of Engineering & Technology 2022 - 2026	GPA 8.7 / 10.0
Intermediate Education (MPC) Chaithanya Kalasala Govt Aided Jr College	GPA 9.3 / 10.0
SSC Bhashyam High School	GPA 10.0 / 10.0

SKILLS

MERN Stack		Next.js	React.js	MongoDB	JavaScript		Node.js	Express.js	Redux.js	RESTful APIs
Git	Tailwind	Bootstrap	HTML	CSS	C++	C	TypeScript	DSA	LLM Integrations	

PROJECTS

Fashora - AI Powered Full Stack E Commerce Platform

- https://fashora-psi.vercel.app
- Architected a production-grade e-commerce system using the MERN Stack, React Redux, and Tailwind CSS with role-based access control, admin operations, and real-time updates across 30+ secured API endpoints.
 - Built an AI-driven product description workflow using Gemini AI, BullMQ, and Redis queues with retry, timeout, and fallback strategies, decreasing manual content generation effort by 60%.
 - Configured Stripe Checkout with webhook validation, Socket.IO live notifications, JWT session handling, and Cloudinary asset storage, boosting transaction security by 45% and operational efficiency by 40%.

Secretly - AI Powered Anonymous Messaging Platform

- https://secretly-eta.vercel.app
- Created an anonymous messaging application using Next.js 16, React 19, TypeScript, MongoDB, and Tailwind CSS featuring secure session management, OTP verification, and protected backend routes.
 - Developed AI-based message suggestion functionality powered by Gemini AI alongside Zod schemas, React Hook Form, and debounced username checks, increasing interaction efficiency by 35% while minimizing invalid submissions.
 - Connected Resend email APIs, personalized inbox controls, message-sharing workflows, and WhatsApp integration, lowering fake registrations by 40% and driving user engagement growth of 45%.

YouTube + Twitter Backend API

- https://github.com/sapphire2207/youtube-twitter-backend
- Engineered a scalable Node.js, Express, and MongoDB backend merging video-streaming capabilities with microblogging features through 9 modular RESTful service domains.
 - Established token-based security with refresh-token lifecycle management, HTTP only cookies, and resource-level authorization checks, cutting unauthorized access attempts by 45%.
 - Built Cloudinary and Multer powered media processing workflows with automated cleanup handling, reducing storage usage by 50% and improving media retrieval performance by 60%.
 - Constructed complex MongoDB aggregation pipelines supporting feeds, search, pagination, engagement tracking, playlists, subscriptions, watch history, and creator insight analytics.

COURSES

Udemy: Complete Web Development Course 2026

KEY ACHIEVEMENTS

 SMART INDIA HACKATHON Worked with a team of 4 in the Railway Complaint Management project, where we delivered a presentation that secured us a spot in the 2nd round out of 25 teams.	 College Website Collaborated with a team of 2 to create a dynamic college website for the Artificial Intelligence and Data Science club, featuring announcements, syllabus, and curriculum.
